

# ACCOUNTS PAYABLE AUTOMATION

## About Element3

Element3 Solutions provide innovative software to let companies streamline the way they work with documents. Effective solutions for image recognition, document creation, conversion and management.

We help companies dramatically lower the costs associated with manual data entry.

## INTEGRATE WITH YOUR ERP OR DATABASE

### The Challenge

Manual accounts payable processing can cost you a significant amount of time and money and this cost can rise alarmingly due to errors. This labor-intensive process results in costly and time-consuming exceptions and delays.

### The Solution

Element3 Solutions automate the process of invoice scanning, invoice data extraction and classification.

Our solution provides recognition of data on scanned paper or PDF invoices, followed by validation, sorting and archiving to significantly speed up your accounts payable process.

# KEY FEATURES

## Intelligent invoice recognition

Line-item and header details are captured.

## Two OCR engines

A voting scheme increases confidence levels.

## Documents from any source

Paper, scanner, PDF, email, database, web service.

## Multi-page documents

Detects multi-page documents either automatically or by using barcodes.

## Remote scanning stations

Supports multiple scanning stations and remote scanning stations.

## SCANNED DOCUMENTS

Direct scanner connection, multiple and remote scanning stations.

## INPUT DOCUMENTS

Paper, scanner, email, database, web service

## MULTI-PAGE DOCUMENTS

Intelligently associates pages.

## ERP INTEGRATION

Document data is exported directly to the ERP.

## Learning capabilities

The system learns from user input, so no complex setup is required.

## Matching with Purchase Orders

Compares the invoice data with the corresponding PO and highlights discrepancies.

## Configurable

Can be easily configured to fit a specific business process by adding new fields and rules.

## Scalable

Additional scanning, processing, verification and export stations can be added as needed.

## ERP and Database Integration

Easy deployment, can be operational in hours.

## Reports and Analytics

Customised reports for increased visibility and workload balancing analysis.

# KEY BENEFITS

## Reduced costs

Reduces costs by decreasing the amount of manual labor required to type in document data.

## Reduced error rate

Strong validation rules help avoid costly human errors.

## Improved visibility

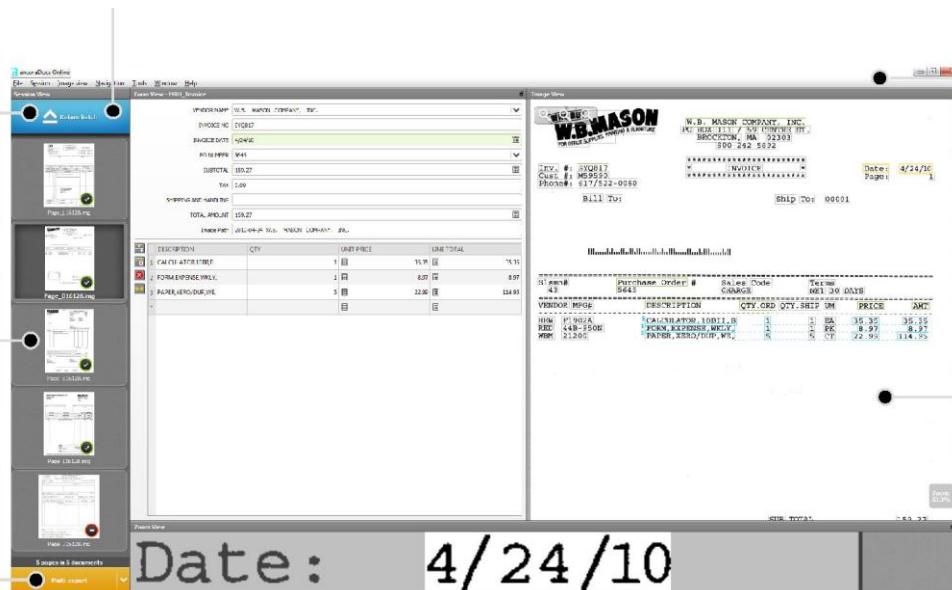

Identifies outstanding liabilities and highlights AP performance.

## Improved cash management

Take advantage of early payment discounts and avoid penalties.

## Maximized productivity

Lets your staff focus on creative tasks.

## INTEGRATED SUPPORT

Live support is only a click away.

## TABLE DETECTION

Detects complex table layouts.
